

Section	Ask	Points	What good looks like	What average looks like	What poor looks like	%
		60	80-fi00%	60-80%	<60%	fi00.00%
Data Loading and Model Initialization	1) Load the SQLite log database 2) Verify/preview required database tables and schema 3) Set up the LLM	5	1) Load the SQLite log database [1.5] 2) Verify/preview required tables/schema successfully [1.5] 3) Set up the LLM [2]	1) Load the SQLite log database 2) Set up the LLM	1) Set up the LLM	8.33%
Defining Tools	Define a list of tools to be used by the AI Agent 1) Tool to query filtered server logs from the database 2) Tool to compute aggregated log statistics 3) Tool to retrieve service dependency mappings 4) Tool to retrieve known error pattern references 5) Tool to search the web for unfamiliar errors, stack traces, or vendor codes 6) Tool to run Python analysis on retrieved log data * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	18	Define a list of tools to be used by the AI Agent [3 marks per tool] 1) Tool to query filtered server logs from the database [3] 2) Tool to compute aggregated log statistics [3] 3) Tool to retrieve service dependency mappings [3] 4) Tool to retrieve known error pattern references [3] 5) Tool to search the web for unfamiliar errors or vendor codes [3] 6) Tool to run Python analysis on retrieved log data [3] * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	Define a list of tools to be used by the AI Agent [3 marks per tool] 1) Tool to query filtered server logs 2) Tool to compute log statistics 3) Tool to retrieve service dependencies 4) Tool to search the web for errors * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	Define a list of tools to be used by the AI Agent [3 marks per tool] 1) Tool to query logs 2) Tool to search the web * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	30.00%
LangGraph Investigation Workflow	1) Define the Agent State 2) Define the planner prompt 3) Define the ReAct agent prompt 4) Define the planner node 5) Define the agent node 6) Define the tool execution node 7) Define the conditional routing node 8) Define the Agent Workflow 9) Visualize the Agent Workflow * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant	15	1) Define the Agent State [2] 2) Define the planner prompt [2] 3) Define the ReAct agent prompt [2] 4) Define the planner node [2] 5) Define the agent node [2] 6) Define the tool execution node [2] 7) Define the conditional routing node [2] 8) Define the Agent Workflow [2] 9) Visualize the Agent Workflow [1] * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the	1) Define the Agent State 2) Define a loose prompt 3) Define the agent node 4) Define the Agent Workflow * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	1) Execute all investigation scenarios/test cases 2) Print the final investigation reports for all test cases 3) Print the trace of AI Agent reasoning and tool usage for all test cases 4) Comment on the accuracy, evidence quality, and relevance of the investigation findings * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	25.00%
Investigation Execution	1) Execute all investigation scenarios/test cases 2) Print the final investigation reports for all test cases 3) Print the trace of AI Agent reasoning and tool usage for all test cases 4) Write observations about the investigation findings	10	All test cases executed [3x(3x1) = 9 + 1 bonus for executing all test cases correctly] 1) Execute investigation scenario 2) Print the final investigation report [1] 3) Print the trace of AI Agent reasoning/tool usage [1] 4) Write observations about the investigation findings[1]	2 test cases executed 1) Execute investigation scenarios 2) Print the final investigation report 3) Print the trace of AI Agent reasoning/tool usage	<2 test cases executed 1) Execute investigation scenario 2) Print the final investigation report	16.67%
Conclusions and Business Recommendations	Key takeaways for the business	4	1) 3-4 Actionable Insights are mentioned [2] 2) 2-3 Recommendations are mentioned [2] [Recommendations can also include points on additional data sources for further analysis, model implementation in real world, potential business benefits from improving the model, etc.]	1) 1-2 Actionable Insights mentioned 2) 1 Recommendation mentioned	Any Actionable Insights or Recommendations mentioned	6.67%
Presentation/Notebook - Overall Quality	- Structure and flow - Crispness - Visual appeal - Conclusion and Business Recommendations OR - Structure and flow - Well commented code - Conclusion and Business Recommendations	8	1) Clear structure and flow - everything sits well in a story [3] 2) Crispness (Not too many words, just enough to keep the focus on key things/points) [3] 3) Visual appeal (Use of charts, colors, diagrams, format, symmetry, informative visualizations that are easy to interpret) [2] OR 1) Well structured notebook with a logical flow [4] 2) Clean and well commented code [4]	1) There is structure and flow but some bits are jumbled 2) Points are made but in too many words 3) Lesser charts, format is not the cleanest OR 1) There is structure and flow but some bits are missing 2) Some of the code is commented * If any section is missing and points have been deducted for the same in a previous section, then no points should be deducted in this section	1) No structure or flow 2) Only a few points are covered, story is not complete 3) Not many visuals used OR 1) no structure or flow 2) no comments in the code	13.33%
