

Section	Ask	Points	What good looks like	What average looks like	What poor looks like	% Weightage
		60	80-100%	60-80%	<60%	100.00%
Data Loading and Model Initialization	- Load the SQLite database - Load the CSV files - Set up the LLM	5	1) Load the SQLite database [1.5] 2) Load the CSV files [1.5] 3) Set up the LLM [2]	1) Load the CSV files 2) Set up the LLM	1) Set up the LLM	8.33%
Defining Tools	Define a list of tools to be used by the AI Agent - Tool to fetch a patient's profile from the database - Tool to fetch the details of a patient's past encounters from the database - Tool to fetch the clinical notes for a patient from the database - Tool to fetch a patient's lab test details from the database - Tool to fetch a patient's medication details from the database - Tool to fetch a patient's allergy details from the database - Tool to fetch the details of common lab tests from the CSV file - Tool to fetch the details of common medications from the CSV file - Tool to fetch the details of common trusted medical information sources from the CSV file * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	18	Define a list of tools to be used by the AI Agent [2 marks per tool] 1) Tool to fetch a patient's profile from the database 2) Tool to fetch the details of a patient's past encounters from the database 3) Tool to fetch the clinical notes for a patient from the database 4) Tool to fetch a patient's lab test details from the database 5) Tool to fetch a patient's medication details from the database 6) Tool to fetch a patient's allergy details from the database 7) Tool to fetch the details of common lab tests from the CSV file 8) Tool to fetch the details of common medications from the CSV file 9) Tool to fetch the details of common trusted medical information sources from the CSV file * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	Define a list of tools to be used by the AI Agent [2 marks per tool] 1) Tool to fetch a patient's profile from the database 2) Tool to fetch the clinical notes for a patient from the database 3) Tool to fetch a patient's lab test details from the database 4) Tool to fetch a patient's medication details from the database 5) Tool to fetch the details of common lab tests from the CSV file 6) Tool to fetch the details of common medications from the CSV file * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	Define a list of tools to be used by the AI Agent [2 marks per tool] 1) Tool to fetch a patient's profile from the database 2) Tool to fetch the clinical notes for a patient from the database 3) Tool to fetch a patient's medication details from the database * The set of tools to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	30.00%
Defining the Agent	- Define the Agent State - Define the ReAct prompt - Define the Agent Nodes - agent node - tool execution node - conditional node - Define the Agent Workflow - Visualize the Agent Workflow * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	15	1) Define the Agent State [2] 2) Define the ReAct prompt [2] 3) Define the Agent Nodes [2.5 marks per node] - agent node - tool execution node - conditional node 4) Define the Agent Workflow [2.5] 5) Visualize the Agent Workflow [1] * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	1) Define the Agent State 2) Define a structured prompt 3) Define the Agent Nodes [2.5 marks per node] - agent node - conditional node 4) Define the Agent Workflow * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	1) Define the Agent State 2) Define a loose prompt 3) Define the Agent Nodes [2.5 marks per node] - agent node 4) Define the Agent Workflow * The set of nodes and workflow architecture to be used can be modified as required, as long as they are able to provide the relevant information to the AI Agent to pass the test cases	25.00%

Test Cases	- Execute all test cases - Print the AI Agent responses for all test cases - Print the trace of AI Agent messages for all test cases - Comment on the accuracy and relevance of the AI Agent response	10	All test cases executed [5x(4x0.5) = 10] 1) Execute test case [0.5] 2) Print the AI Agent response [0.5] 3) Print the trace of AI Agent messages [0.5] 4) Comment on the accuracy and relevance of the AI Agent response [0.5]	3-4 test cases executed 1) Execute test case [1] 2) Print the AI Agent response [0.5] 3) Print the trace of AI Agent messages [0.5]	<3 test cases executed 1) Execute test case [1] 2) Print the AI Agent response [0.5]	16.67%
Conclusions and Business Recommendations	Key takeaways for the business	4	1) 3-4 Actionable Insights are mentioned [2] 2) 2-3 Recommendations are mentioned [2] [Recommendations can also include points on additional data sources for further analysis, model implementation in real world, potential business benefits from improving the model, etc.]	1) 1-2 Actionable Insights mentioned 2) 1 Recommendation mentioned	Any Actionable Insights or Recommendations mentioned	6.67%
Presentation/Notebook - Overall Quality	- Structure and flow - Crispness - Visual appeal - Conclusion and Business Recommendations OR - Structure and flow - Well commented code - Conclusion and Business Recommendations	8	1) Clear structure and flow - everything sits well in a story [3] 2) Crispness (Not too many words, just enough to keep the focus on key things/points) [3] 3) Visual appeal (Use of charts, colors, diagrams, format, symmetry, informative visualizations that are easy to interpret) [2] OR 1) Well structured notebook with a logical flow [4] 2) Clean and well commented code [4]	1) There is structure and flow but some bits are jumbled 2) Points are made but in too many words 3) Lesser charts, format is not the cleanest OR 1) There is structure and flow but some bits are missing 2) Some of the code is commented * If any section is missing and points have been deducted for the same in a previous section, then no points should be deducted in this section	1) No structure or flow 2) Only a few points are covered, story is not complete 3) Not many visuals used OR 1) no structure or flow 2) no comments in the code	13.33%
